

LABELS for production printing

In today's market customers' demands for short-run printing of labels, leaflets, invitations, calendars etc. are becoming more frequent than ever. Thanks to modern technology production laser printers now allow printing in very high quality, which equals the quality of offset printing. This has the advantage of allowing small quantities with variable information at very affordable prices. More and more printing offices and advertising agencies are now investing in this printing technology. The RAYFILM product range includes a wide range of self-adhesive or non-adhesive materials suitable for laser printers which allow you to print non-standard applications and extend the range of printing services. RAYFILM can offer the following materials for production printing:

**SRA3
LABELS
AVAILABLE**

Self-adhesive paper labels

Paper labels printed in short-runs are suitable for customers who require a limited quantity or labels with variable information. The material R0119 has become the most popular thanks to high glossy surface coating.

- * A4 size is supplied with more than 150 labels sizes and shapes
- * SRA3 size is supplied with back-splits on the reverse side of labels

R0100 – white matte labels in sizes A4, A3 a SRA3
R0102 – white matte labels with a removable adhesive in size A4
R0103 – white matte labels with a special opaque adhesive in size A4
R0119 – white glossy labels in A4, A3 a SRA3

R0160 - Pearl metallized silver labels with 3 mm stripes A4 / SRA3

Cling polyester films

Cling films can be applied to surfaces where a temporary label or sign is required. Especially popular in the advertising market and for promotional signs and banners. They are supplied in glossy clear and glossy white.

- * A4 and SRA3 is supplied with back-splits on the reverse side of labels

R0420 – Clear glossy PET cling films size A4, SRA3
R0520 – White high glossy PET cling films size A4, SRA3
