

RAYFILM labels

RAYFILM labels

LABELS

for any application . . .

RAYFILM labels are made from carefully selected labelstocks that meet high quality requirements. A wide range of self-adhesive papers and films brings choice to all customers – everybody finds the right product for any application.

Rayfilm labels is packed in colour cardboard packs of 10/ 20 sheets or solid boxes for 50/100 sheets. For those such as advertising companies or graphic studios with larger printers price-friendly BULK boxes of 1.000 sheets are available.

more than 150 standard label shapes and sizes

we can customize any label size or shape

To present a clearly arranged label portfolio we have sorted our products to three categories according to their use and price, to quality performance ratio.

Everyday labels

Rayfilm Everyday labels are designed for regular use at home or in the office. They are made of white paper with permanent adhesive, that is suitable for any printer or copier. Everyday labels have an excellent price to quality ratio.

EVERYDAY labels are produced in RAYFILM branded boxes of 100 A4 sheets. In the range there are over 30 of the most common sizes for printing addresses, barcodes, CD-labels, etc. There are also bulk boxes of 1.000 A4 sheets available.

ROECO - Matte white universal labels

White universal labels are the most popular labels due to their low price and a wide range of applications. They are made of 60gsm bright paper printable on all common printers and copiers. The stable permanent adhesive and kraft liner make these labels trouble-free during feeding and passing through printers.

Synthetic labels

Rayfilm Synthetic labels for computer printers and photocopiers give you the possibility to utilize all the unique features of plastic film materials such as transparency, metal-look, outdoor use, extreme durability and stability. These features will make your labels as good as you need.

The SYNTHETIC labels are made of polyester and polyethylene computer printable films. In the range there are films for laser printers and copiers but you can also find here clear film for inkjet printers for mirror printing or indoor applications. Short runs of laser printed filmic labels can substitute for expensive huge jobs made in printing shops. The labels are of the same quality and offer effective variable printing. The films are transparent glossy or matte, opaque white or silver, cut to almost 20 sizes and packed into packs of 10/50/ 100 or 1.000 sheets.

R0360 - Matte transparent polyester laser labels

Matte transparent laser labels are made of 50 micron polyester with excellent toner anchorage. You can expose them to outdoor conditions without any need to laminate the printed image. The matte polyester labels are often used as a corrective tool for technical drawing.

R0400 - Glossy clear polyester laser labels

The most important feature of the clear labels is their invisibility when applied on any surface. The labels are made of 50micron polyester with good toner adhesion. Wherever you stick the label it looks as if the image was printed direct on the labelled surface. If you print the mirror image, stick the label on the glass back you can see the image through the glass in its true form.

R0466 - Glossy clear polyester inkjet labels

Clear labels are very popular due to their specific features (high glossy, transparency,...). They are made of 60 micron polyester film coated with an inkjet receiving layer. This coating enhances colour vivacity, image sharpness and shorten drying time.

R0502 - Matte white polyester laser labels

White laser labels are made of 60 micron polyester with excellent toner anchorage. People like these labels for their high whiteness, opacity and outdoor durability.

R0503 - Matte white universal outdoor PE labels

White laser labels are made of 180 micron polyethylen with excellent toner and ink anchorage. People like these labels for their high whiteness, opacity and outdoor durability. Material is more flexible and friendly for difficult surfaces.

R0504 - High glossy white polyester laser labels

High Glossy white laser labels are made of 60 micron polyester with excellent toner anchorage. People like these labels for their high whiteness, opacity and outdoor durability.

R0555 - Matte silver polyester laser labels

Matte silver label stock looks like an aluminium plate. The labels are made of 50micron metallized polyester with big durability and excellent printability. They are goal-value and a much cheaper substitution for metallic tags.

Office labels

Rayfilm Office labels for computer printers and photo copiers are always the right choice no matter what application they are used for.

Whatever the application, whether you need to mark, sign or simply stick something together just choose the appropriate product from Rayfilms wide label range (white, opaque, removable, coloured, radiant or glossy labels).

The OFFICE line covers a wide range of paper labels for computer labels and copiers. We cut more than 150 label sizes and you can find here both standard labels used in offices, and specialties for the most demanding applications. In the line there are white matte or glossy labels, removable labels, colour or fluorescent labels, labels made of inkjet photopaper; enhancing your colour printing, and many others. The OFFICE labels are packed either in packs of 10/20 sheets or in 50/100 sheet boxes. Bigger printers can be served with bulk industrial boxes of 1.000 sheets.

White labels

R0100 - Matte universal labels

White universal labels are the most popular labels due to their low price and a wide range of applications. They are made of 70gsm bright paper printable on all common printers and copiers. The stable permanent adhesive and kraft liner make these labels trouble-free during feeding and passing through printers.

R0102 - Matte universal removable labels

These labels are made of the same paper as R0100. The only difference is a special removable adhesive. Should you need the label to remove or reposition just peel it off. You neither brake the label neither leave any glue residues.

R0103 - Matte universal opaque labels

These labels are made of the same paper as R0100. The only difference is a special opaque adhesive. This is the right label for any use where you need to cover texts, pictures or previous labels.

R0105 - Photomatte inkjet labels 95g/m²

RAYFILM photomatte labels are made of 95gsm paper with a special inkjet coating enhancing colour vivacity and image sharpness. The printouts will always be much better than with common uncoated labels.

R0107 - Photomatte inkjet labels 180g/m²

RAYFILM photomatte labels are made of 180gsm photomatte paper. This material is ideal for (380gsm) photomatte double-sided cards, business cards, ...

R0113 - Photoglossy inkjet labels 190g/m²

These labels are made of the highest resolution paper of 190gsm with special glossy inkjet coating enhancing colour vivacity and image sharpness. This material is ideal for (395gsm) glossy double-sided cards, business cards, ...

R0115 - Photoglossy inkjet labels 120g/m²

These labels are made of the highest resolution paper of 120gsm with special glossy inkjet coating. This material is ideal for CD/DVD ROM labels, photostickers, ...

R0119 - Glossy laser labels

The reasonable price of colour laser printers has increased demand for the media specially developed for this printing technology. RAYFILM brings you self-adhesive labels with excellent colour presentation and toner anchorage. They are made of glossy coated 80gsm paper with perfect feedability and flatness. Whenever you need a professional colour label you can rely on this special laser paper.

Colour labels

R0120 - matte green universal labels

R0121 - matte yellow universal labels

R0122 - matte red universal labels

R0123 - matte blue universal labels

Colour universal labels are very popular due to their reasonable price, variety of applications and universal printability. They are made of pastel coloured 80gsm paper, permanent adhesive and kraft liner.

Radiant labels

R0130 - radiant green laser labels

R0131 - radiant yellow laser labels

R0132 - radiant red laser labels

R0133 - radiant orange laser labels

R0134 - radiant pink laser labels

With radiant labels you can easily make decorations or attention attracting stickers for your products. They are made of a wide gamut of laser printable 80 gsm papers. The shining colours do not let you overlook warnings and help you to catch the eyes of your customers
